State of the art, modular system for slatted timbers, ceilings, walls and screens

New thinking. New simplicity.

modinex.com.au

New thinking. New simplicity.

When it comes to inspiring spaces, nothing makes an impact quite like an architectural timber ceiling, wall or screen.

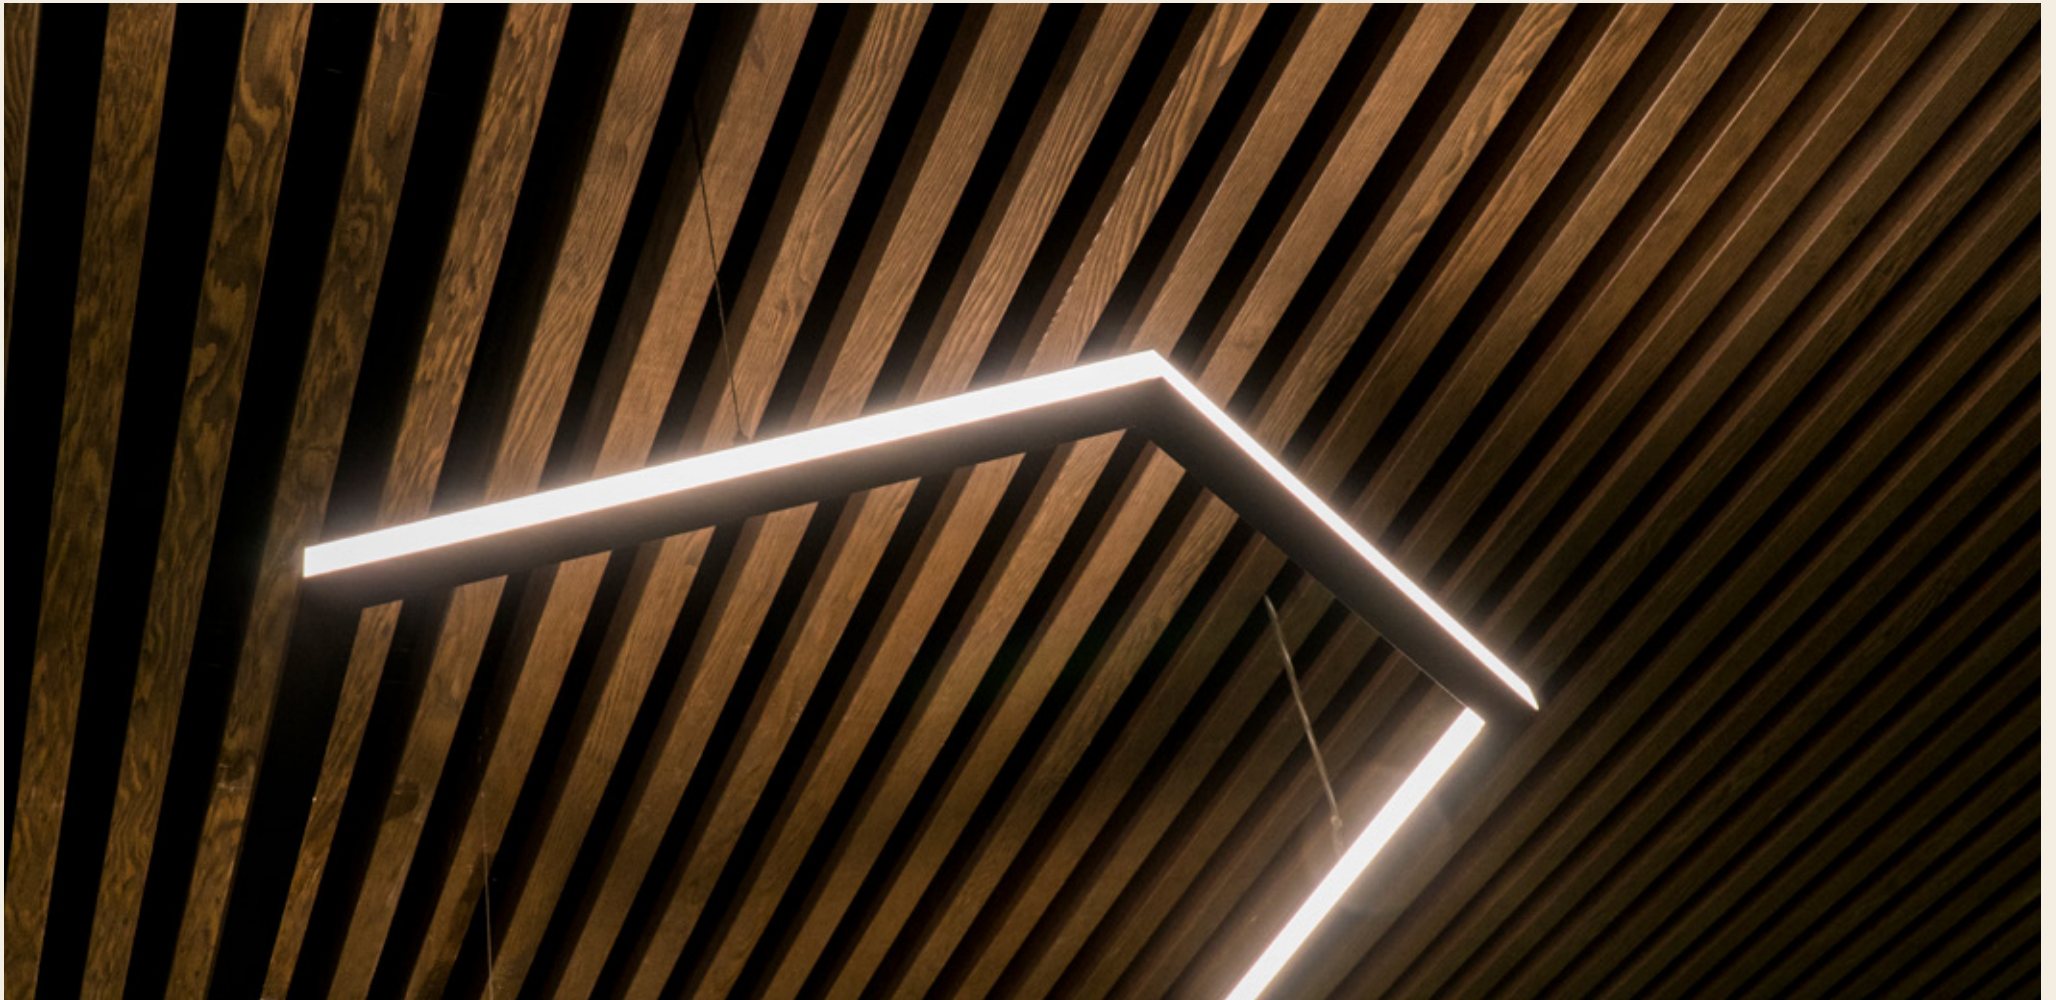

Colour, warmth, tone and texture – timber has a unique, sophisticated appeal.

However, the associated lead times, as well as the need for expert-installation skills, has traditionally rendered genuine timber statements out of reach for many commercial and residential projects...until now.

Introducing Austratus, a new product innovation from architectural timber specialists, Modinex.

Be inspired. Get creative. Make a statement.

"The Modinex team was great to work with. They produced several prototypes in a short timeframe to get the best result. The battens look great in place and the system was quick and simple to install."

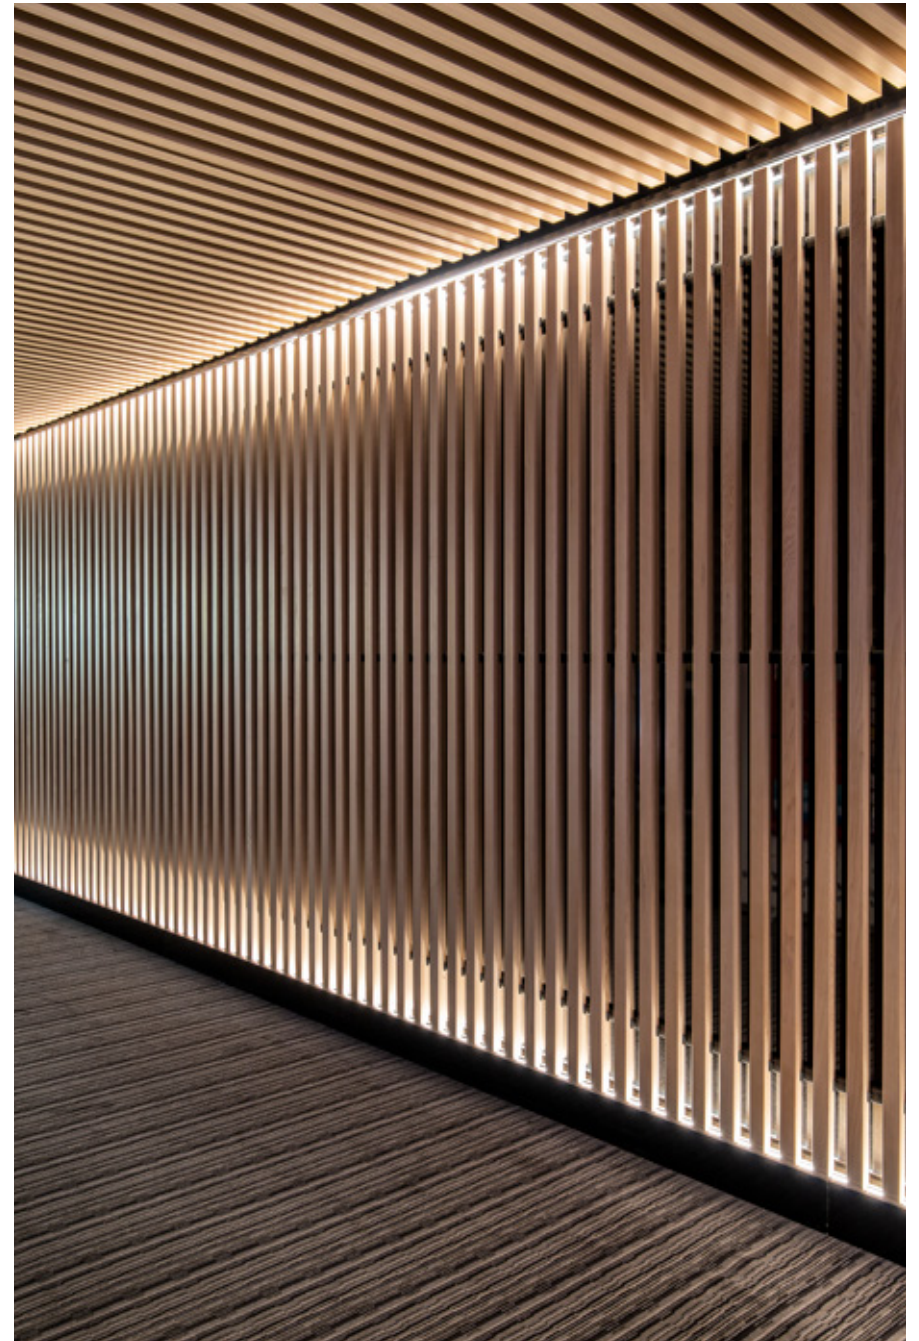

Thomas O'Shea, Loucas Zahos Architects

The simplicity and convenience of the Austratus patented system

Our patented fitting system allows continuous lengths of timber to be simply and easily clipped into a suspended ceiling. It can also be screwed directly onto existing walls and ceilings.

Fit-out companies, builders and architects will agree, Austratus makes it easy to achieve brilliant results. How?

- **Fast quotations** – no exacting site measures required – just the square meterage of your ceiling, wall or screen.
- **Reduced lead times** – the added convenience of our off-the-shelf system reduces lead times and keeps your project moving. Even coloured washed profiles are available within relatively short times.
- **Easy installation** – no specialist installation skills required.
- **Straightforward customisation** – on-site beam replacement and adjustments are a breeze.
- **Choice of stylish profile designs** – achieve your desired look with ease.
- **Designer palette** – pre-finished colour options unlock a world of creative possibilities.
- **Cost-effective** – when you choose Austratus, the convenience of quick quoting, reduced lead times, and easy on-site installation brings financial and time-saving benefits.

Packed with features

More than just good looks, the Austratus system offers choice, convenience and flexibility.

Suspended Ceiling System

Complete, off-the-shelf, clip in batten suspended ceiling system

Easy to Replace

Easy to replace elements of system (e.g. damaged panels or fins)

Easy to Install

Complete, off-the-shelf, clip in batten suspended ceiling system

Variety in Timber

Three different timbers as standard (Hemlock, Western Red Cedar & Western Red Cedar Select Tight Knot). Hardwoods and other timbers available for custom orders (set up fee may apply)

Sustainable Timber

Western Red Cedar & Hemlock are Sustainably harvested PEFC™ Certified timber

Exterior Application

Aluminium and Western Red Cedar material options can be used for external applications

Diverse Looks

Range of colours available (many pre-coated options) or raw

Group 1 Fire Rating

Austratus aluminium profiles achieve a Group 1 Fire Rating

Aluminium - Timber Grain /or Solid Colours

Timber Grain aluminium colours available. Other solid colour aluminium also available for custom orders (set up fee may apply)

Easy To Order & Short Lead Times

Customisable Clip In Batten style system makes it very easy to order and get delivered to site without having the lengthy pre site measures, shop drawings and pre made to size panels

Project - Federation University, Flecknoe Building Ballarat Central, Victoria

Product Featured - Austratus Fin Profile 30x60mm Material Used -
Hemlock in Midnight Seas

Colours and species available

Austratus is available in your choice of Softwoods, Hardwoods and Aluminium. To complete the perfect look, Austratus offers a range of stylish finish options. Colour, warmth, tone and texture – timber has a unique, sophisticated appeal.

For Western Red Cedar, choose the classic Clear coating. You can also choose a rustic, knotty option from our Lumba Colour Range. Introducing Austratus, a new product innovation from architectural timber specialists, Modinex.

Our Hemlock profiles offer a range of stunning choices. Choose from classic Clear, or select an option from our brand new range of trending, beach themed colours (exclusive to Modinex Group). This stunning range is inspired by the natural hues of Australia's coastline and comes in a subtle matt finish.

With Aluminium profiles, you can choose between timber grain colour options or a shade from the vast variety of solid colour options. Our aluminium battens are powder coated and boasts superior quality with 25 year limited warranty.

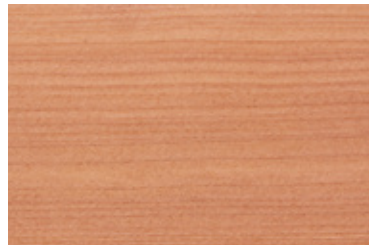

Softwoods

Our range of Softwoods consist of Western Red Cedar, Western Red Cedar in Select Tight Knot, Hemlock and Yellow Cedar. These practical species have a smooth texture and straight, fine-lined grain, making it the ideal substrate for coating and staining. Achieving the perfect finish is easy with softwoods.

- **Smooth & stylish** – Softwoods' smooth texture can be sanded to a silky, reflective surface for a light ambience that darkens with age.
- **Resilient surface** – Softwoods is strong and offers excellent wear resistance. Instances of warping and twisting are low.
- **Sustainable** – our Softwoods is PEFC™ Certified.
- **Perfect for coatings** – Softwoods is ideal for coating and staining, accepting any paint, stain, or clear finish with outstanding results.
- **Easy to work with** – Softwoods responds well to planing and moulding and can be both screwed or nailed.

Photographs and drawings used are for illustration purposes only. Colours, grades and finishes on true products may vary. To view a physical sample or to order a sample kit, please contact your Modinex representative.

Hardwoods

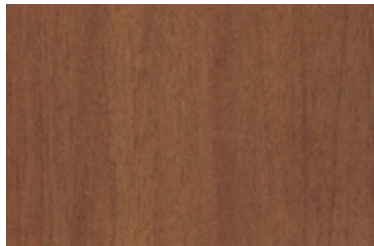

Hardwoods are praised for their unprecedented style. They are well recognised for their luxurious appeal and durability making them ideal for both commercial and residential applications.

- Hardwoods have greater longevity resulting in a very high quality product that offers great durability over time.
- Easy maintenance as hardwood is easy to clean, and scratches and dents can be fixed.
- The trees' dense cellular structure gives the timber incredible strength which is why hardwoods are a much more solid material when compared to softwoods.
- Hardwood timber is available in a range of colours and finishes, and will suit almost any contemporary style setting.
- Hardwood timber is ideal for bush fire prone areas as it is more fire resistant, than softwoods with a BAL 29 rating.

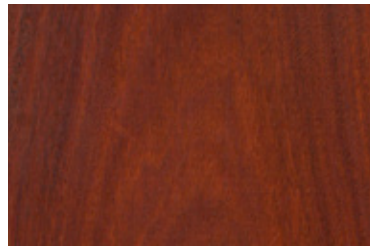

Available hardwoods species

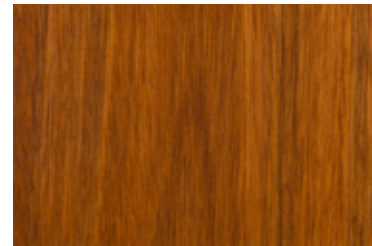

Blackbutt

Cumaru

Ironbark

Spotted Gum

Aluminium

Aluminium battens can be a great option as it's sustainable and low on maintenance compared to its softwood and hardwood alternatives. Available in timber grain finish, our aluminium battens are powder coated and boasts superior quality with a 25 year warranty.

- Versatile, distinctive and stylish – able to achieve a variety of aesthetics.
- Group 1 Fire Rating - As a non-combustible product, aluminium is your choice for when you need to achieve Group 1 fire ratings on your project.
- Long life - Aluminium is lightweight, durable and easy to work with.
- Sustainable - Aluminium is sustainable in nature as it can be easily recycled.
- Suitable for high traffic commercial spaces like hospitals, conference centres and residential buildings.

Combine profiles to create unique architectural features

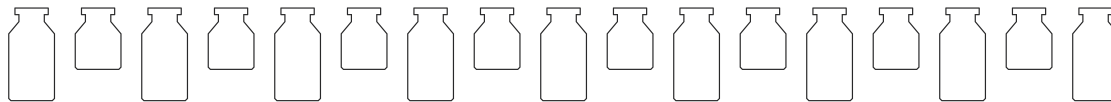

Below are some standard combination examples for inspiration. We can't wait to see what other exciting combinations are created.

Combination #0001

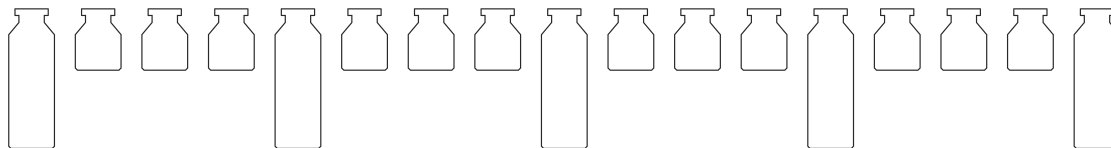

Combination: Fin 90x30mm, Fin 60x30mm, Fin 40x30mm, Fin 60x30mm, Fin 90x30mm.

Combination #0002

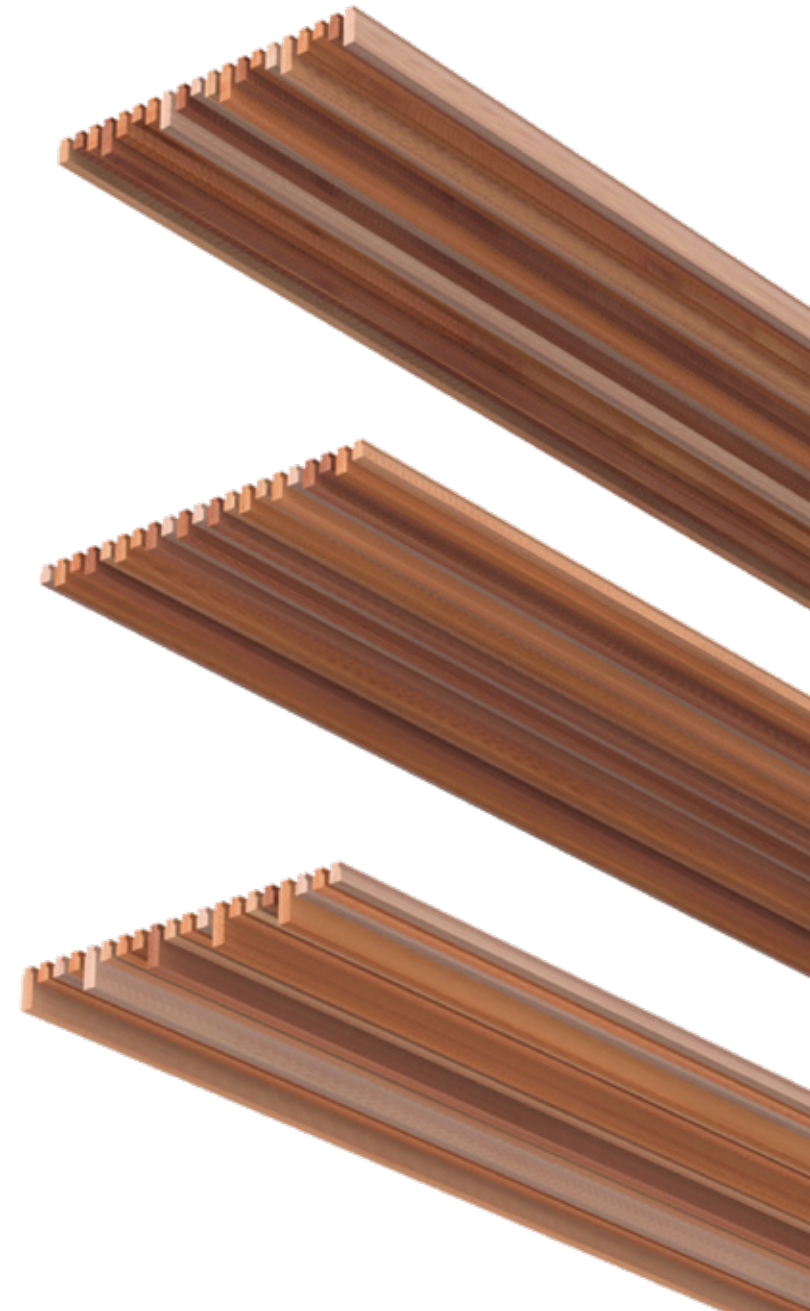

Combination: Fin 60x30mm, Fin 40x30mm, Fin 60x30mm, Fin 40x30mm.

Combination #0003

Combination: Fin 90x30mm, Fin 40x30mm, Fin 40x30mm, Fin 40x30mm, Fin 90x30mm.

It was a pleasure dealing with the Austratus team - from estimating to delivery - they helped us all the way, which made a complex project just that little bit easier. Their installation system was refreshingly easy to work with and adapt for the specific project. The fact that they were able to meet all the architects' requirements regarding the finishes, whilst delivering the materials to meet the program would definitely make me want to recommend them as an alternative to any specified ceiling system on future projects. I look forward to doing more projects with Austratus."

Talk to us about your custom requirements

If you require even more choice and flexibility, talk to your Modinex representative regarding your custom project needs. Backed by the in-house manufacturing and coating capabilities of architectural timber specialists, Modinex, Austratus can provide custom solutions to set your next project apart. Consider us your project design partner. Talk to us about timber species selection, customised profile shapes, unique combinations and bespoke finish options.

The only limit is your imagination.

Specifying Austratus is easy

Step 1

Measure your space

The square meterage is all you'll need to get started.

Step 2

Specify the species

Austratus is available in Softwoods, Hardwoods and Aluminium. Remember to specify either Clear Grade or Knotty Grade when specifying Western Red Cedar.

Step 3

Select the profiles

Austratus offers five standard profile designs. All fin profiles are interchangeable, meaning you can specify more than one profile for your project if you wish (see standard combination examples or create your own combination from scratch).

Step 4

Determine the spacing

For an economical solution, profiles can be spaced at larger intervals (normally in 30mm increments) to reduce the number of profiles needed.

Step 5

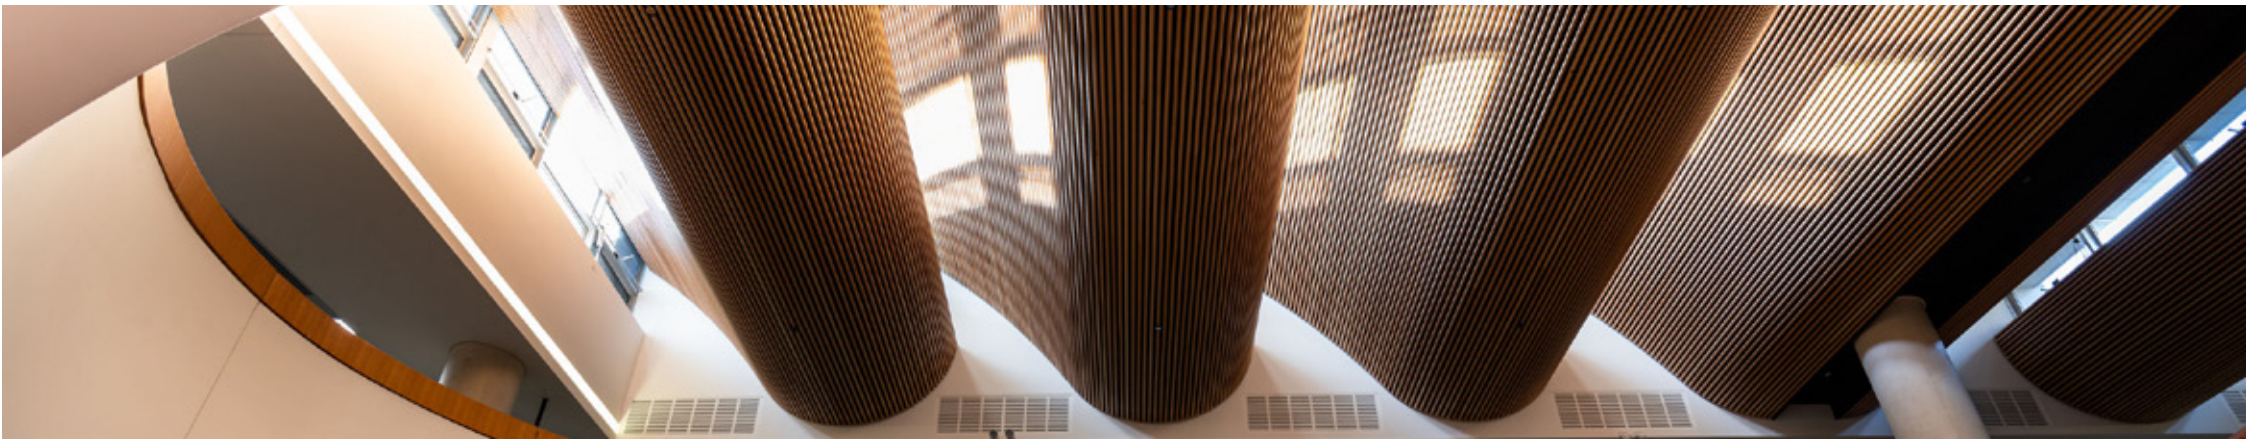

Choose the perfect finish

From Softwoods, Hardwoods and Aluminium options

Softwood profiles are available in Western Red Cedar - Classic Clear, in Knotty Grade - Lumba colour ranges and Hemlock in beach themed colours.

Hardwood options are available in Spotted Gum, Ironbark, Blackbutt and more.

Aluminium profiles are available in both timber grain and solid colour options.

Project - Indooroopilly Shopping Centre

Product Featured - Austratus Fin Profile 29x16mm Material Used - Spotted Gum in Clear Matt coating

Need help making your decision?

Contact your Modinex representative to discuss your exact project needs. You can also order an Austratus Product Sample Kit if you wish to see physical samples of the product before making your decision.

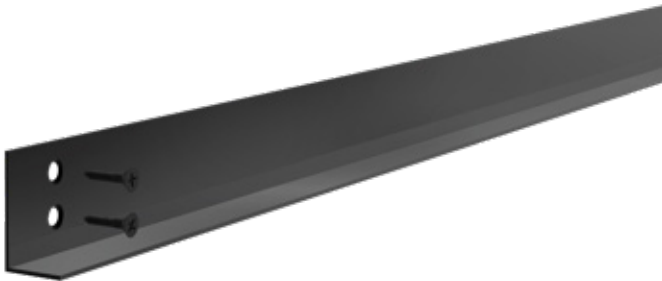

For more detailed installation information and videos on walls, screens and ceilings, visit modinex.com.au.

Installation made easy - Four simple steps.

[Austratus Install Guide Video](#)

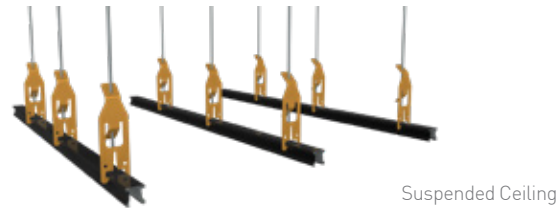

STEP 1:

Simply fix your L-shaped trim to the walls as a level border.

STEP 2:

Place rails up to 600mm apart.

STEP 3:

Place the plastic clips onto the battens approximately 600mm apart. The clips slide for minor adjustments.

STEP 4:

Now you're ready to start inserting your timber lengths. Simply push the timber up, clicking the clips into the rails.

Modinex

Modinex have a policy of continual improvement to specification. Product colours, grades, finishes and sizes may change without notice.

Due to printing restraints, actual colours, grades and finishes may vary from that shown in brochure.
